

Sean R. Pelillo

Wilmington, DE | Knoxville, TN | (302) 358-7191 | spelillo11@gmail.com | linkedin.com/in/sean-pelillo/

EDUCATION

University of Tennessee, Knoxville – Haslam College of Business | August 2022 – May 2026

Bachelor of Science in Business Analytics

Major: Business Analytics | *Concentration:* Information Management

- **Business Professional Coursework:** Public and professional speaking, workplace writing and communication, finance, accounting, economics, and business management principles
- **Technical Coursework:** Database management using SQL, data analysis with Excel and RStudio, data visualization in Power BI and Tableau, information systems, cybersecurity fundamentals, and web/mobile application development.

Certifications

- **Business Intelligence & Data Analyst (BIDA®)** – Corporate Finance Institute (CFI), 2026

WORK EXPERIENCE

CGI Federal | Business Analyst — Knoxville, TN | June 2025 – July 2026

- Developed an interactive inventory dashboard using HTML, CSS, JavaScript, and Power BI.
- Researched and evaluated federal government contract opportunities while organizing pursuit documentation in Excel.
- Contributed to a fraud detection project by creating synthetic data used to help train and improve a fraud detection model.
- Created a mobile application homepage prototype for an internal project.
- Performed website testing to identify issues and verify application functionality.

Titus Sports Academy | Data Analytics Intern — Wilmington, DE | June 2024 – August 2024

- Built Excel tables to track athlete performance.
- Created player evaluation sheets that updated automatically from master datasets.
- Used JMP to analyze training data, identify trends, and compare drill performance.
- Helped coaches make more informed player evaluations through data-driven reporting.

PERSONAL PROJECTS

Sean Pelillo Enterprises | <https://spelillo.github.io/seanpelilloenterprises/> - Portfolio of software projects.

- **Synth:** Website that allows CSV files to be uploaded and then queried using sql syntax. Also includes an AI assistant to help refine queries and ask questions about data relationships. Users can export queries as custom charts, excel sheets, and image files for presentations.
- **PitchModel:** Baseball analytics project built in RStudio that uses historical MLB pitching data to predict the next pitch likely to be thrown.

TECHNICAL SKILLS

- **Programming:** SQL, Python, R, JavaScript, HTML, CSS
- **Analytics & BI:** Power BI, Tableau, Excel (PivotTables, Power Query), JMP
- **Business Intelligence:** Dashboard Development, Data Visualization, Data Analysis, Reporting, KPI Tracking
- **Other:** Microsoft Office Suite, Technical Communication, Problem Solving, Process Improvement
